

From a Dr. Phil Show spokesperson:

The "Dr. Phil Show" believes in keeping TV production in Los Angeles and since the beginning of this project, the "Dr. Phil Show" has been granted all the permits required by the L.A. Film Commission, up to and including the last week in September.

Our primary objective has always been to be extremely respectful of the neighbors and we have accommodated their requests whenever any have arisen. We also received the support of many of the neighbors who commended us for our consideration.

There has not been any exterior taping in front of the house and production vehicles did not park on the street. In addition, the show made many improvements and upgrades to the home and provided 24-hour security to the area surrounding the house.

We taped episodes which fulfilled the directive of the "Dr. Phil Show" - to provide guests with a compass to solve issues and conflicts in their lives.

The Dr. Phil Show has completed filming at this location, which was never intended to be the only site of the Dr. Phil House.
